

Introduction:

Hello everyone, welcome to this video. Today, we will be giving you a tutorial to help you get started on our Prison server.

Please remember to leave a like and comment any video suggestions you have down below.

Cells:

Every player is provided with a free cell. To go to your cell, type in /cell. For more information on cells, type /cell help.

Warps:

If you are ready to start mining, type in /mine and you will be teleported to the mine based on your rank.

/warps will open up a menu that will provide you with different locations you can teleport to.

Pickaxes:

You will need a pickaxe to start mining. Your starter kit will already provide you with a pickaxe you can use.

When you start mining, your pickaxe will gain experience points and level up, each level grants you an Upgrade Token to spend for extra perks.

To upgrade your pickaxe, shift and right click at the same time to open the upgrade menu. An enhanced pickaxe will help you mine more efficiently.

Through the same system, you will be able to add vanilla enchantments which, combined with the custom upgrades, will improve your pickaxe.

If your pickaxe is close to breaking, you can easily fix it through the upgrade menu by using experience levels.

Rankups:

As you start mining, you will obtain blocks to sell in /shop

Use those blocks to earn money and rank up. Type in /rankup to upgrade to the next rank.

Each rankup will increase in price, and the blocks in your mine will change and be of higher value.

Type in /ranklist to see how much you need to upgrade to the next rank, and to see the rankup price for all the other mines.

You can enable auto rankup in the settings (/sett).

To see what a block is worth, type in /worth while holding it, it will show a description in the chat detailing the block's sell price.

Prestige:

When you've ranked up from Z, you reach Prestige. With Prestige, you can unlock many perks.

Each rankup grants you a Prestige Token. You can use them to unlock the perks you want.

You will start over from mine A, and to rankup you will need money and "reputation".

"Reputation" is automatically earned while mining and it equals the worth of a block in the shop.

You are required to obtain a certain amount of money and a certain amount of reputation to rank

up.

Each Prestige rank increases the price by 20% of the original price.

Events:

Our Prison server offers several kinds of events such as:

Dig The Pit, which is automatically hosted every 2 hours. The goal is to mine as many blocks as possible, with each block having a different amount of points.

The top 10 miners get rewarded. When prompted to join the event in chat, type /warp dtp.

It also offers several other events, which can be seen on our other gamemodes. Events such as: capture the arena, bossfights, drop parties and vote parties.

Extras:

Lucky blocks can be found while mining, and once you break one, it will give you a reward that you can grab using the command, /rewards.

Miner keys and haste potions are also obtainable by lucky blocks, or by mining. The progress to unlock them can be seen in /mine stats.

Bombs:

You are able to collect bombs to help you with mining. You can find them in crates or lucky blocks.

The bombs can be thrown in mines and any affected blocks go in your inventory. If you hold the pickaxe while the bomb explodes, your pickaxe gains XP.

There are several kinds of bomb you can collect, all with different abilities such as: normal bombs, laser, silk, ghost, nukes, grapple and many more.
